

Installation Procedure

Metallic Panels

1. Measure and mark the surface where the panel is to be installed.
2. Using 10.5 mm drill bit, make holes in marked positions.
3. Place the first panel in position and screw it to the surface using the screws provided.
4. Insert the second panel into the groove of first panel.
5. Install the panels in sequence as shown in the figure.
6. Make sure that the panels are properly fixed in position.
