

## Perforated Wooden Panels

Perforated wooden panels offered by Acoustics India are indomitable in quality and performance. Machine perforated Medium Density Fibre (MDF) board with fibreglass tissue attached to its back constitutes the panel arrangement. Our perforated panels provide excellent flutter echo elimination, reverberation time reduction and it is suitable for a wide variety of spaces.

### Technical Details

- Material : High Quality MDF board
- Size : 600 x 600 x 25 mm

### Acoustical Performance

Absorption Coefficient Value						
Size(mm)	125 Hz	250Hz	500Hz	1000Hz	2000Hz	4000Hz
600 x 600 x 25	0.12	0.23	0.56	1.09	1.03	1.03

### Salient Features

- Visually pleasing
- Efficient acoustical performance
- Impact resistant
- Moisture and mildew resistant
- Fire resistant
- Easy to install

## Perforated Wooden Panels

### Applications

- Cinema Theatres
- Studios
- Recording Rooms
- Conference Centres
- Reception Halls
- Office Rooms
