

## Suspended Absorbers

Acoustics India offers suspended roof absorbers designed to reduce reverberant noise in large open areas. Our roof absorbers are an effective and economic alternative to installing a full suspended acoustic ceiling. It is widely used in large domestic as well as industrial areas.

### Technical Details

- Material : Fibreglass wool and Others
- Size : 600 x 1200 mm

### Acoustical Performance

Absorption Coefficient Value					
125 Hz	250Hz	500Hz	1000Hz	2000Hz	4000Hz
0.07	0.55	0.9	0.95	0.95	0.95

### Salient Features

- Visually appealing
- Varied colours available
- Excellent acoustical performance
- Easy to install

## Suspended Absorbers

### Applications

- Call Centres
- Leisure Centres
- Galleries
- Studios
- Food Factories and Bottling Plants.
